

# ProjectReady®

## Simplify, Unify & Collaborate Across Your Projects

**What you design and build is complicated. Getting your project done, shouldn't be.**

With content from Autodesk to Microsoft Office, created and stored in different places, knowing what you have to do, while working with information and a team that can be anywhere, is its own unique challenge.

The answer is ProjectReady – driving process to get more value from what you own, reduce routine tasks from hours to minutes, and take control of your projects.

**Build Your Project**

**Know What To Do**

**Take Action**

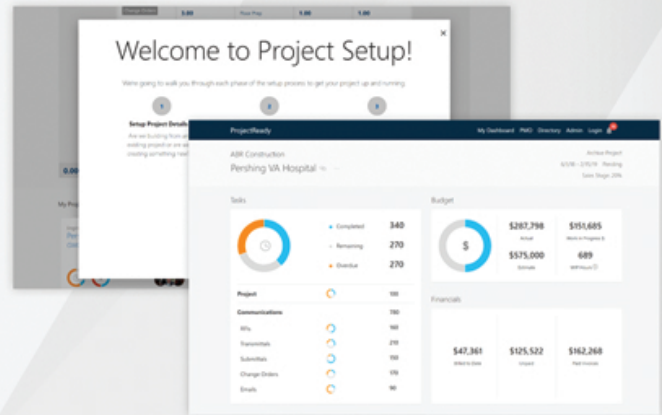

**Connect Content**

**Communicate**

## Build Your Project

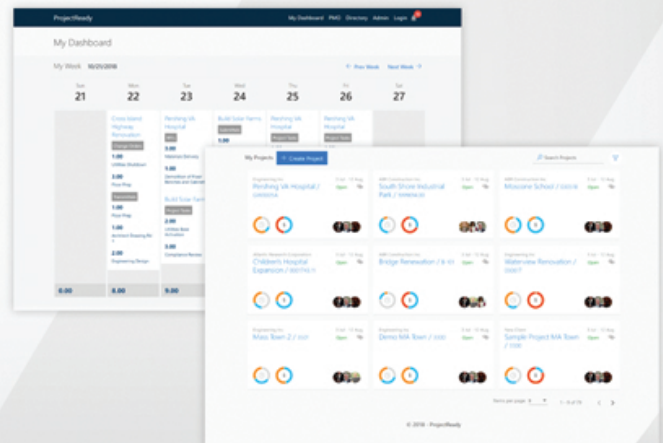

In a few clicks, setup your project, build your team, and create and connect the places they need to work together - SharePoint, Autodesk BIM 360, Microsoft Teams and Box.

## Know What To Do

Projects built by ProjectReady bring everything together from the start, so you know what you have to do across your day.

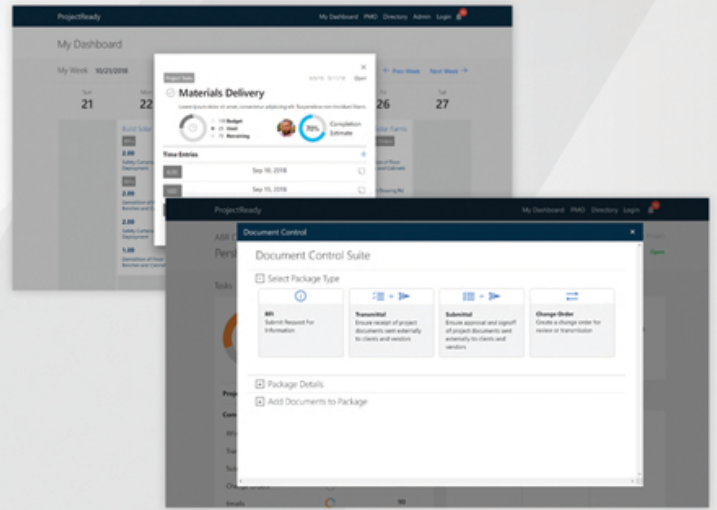

Our Dashboard keeps you informed - from project tasks, to approvals of document control packages, to emails that need follow up and quickly lets you know what projects are at risk and what your priorities are.

## Take Action

With your priorities set, quickly go to the project and take action. ProjectReady provides all the tools you and your team need to get the job done:

- **Document Control:** Create, Distribute & Track Approval of Content Across SharePoint, Autodesk BIM 360 & Box
- Manage Time against Tasks
- Make email actionable in Outlook
- Create Punch Lists
- Generate Estimates, RFP's, SOW's & Word Documents

## Connect Content

ProjectReady makes it easy to securely stay connected and control your project documents across connected systems.

**Process over platform:** with ProjectReady content is connected from the start, driving value and efficiency from what you already own. Take the creation and approval cycle of critical correspondences from what was hours down to minutes.

### Connect Content From:

Autodesk BIM 360  
SharePoint  
Box  
Email  
Microsoft Teams

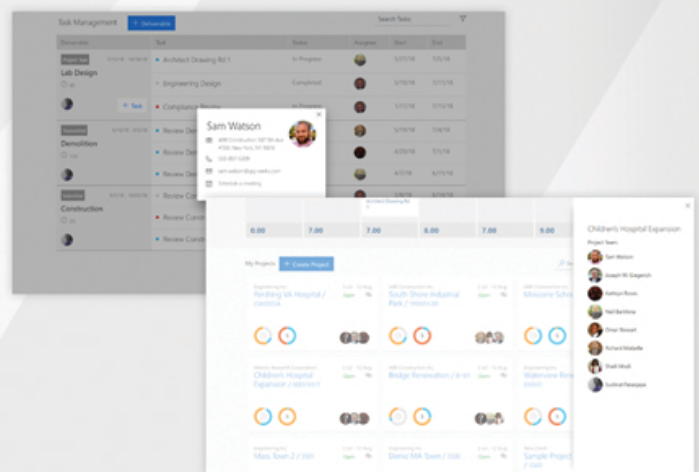

### Control Content Across:

Transmittals  
RFI's  
Change Orders  
Submittals

## Communicate

Throughout your day, you need to know everybody you are working with and be able to simply communicate with them. With ProjectReady, our directory means communicating with your team is easy to do and driven by context. Email, call or schedule a meeting with your team from anywhere in the system, and access all companies, people and projects you're working with.
